Visions become reality.

29 Nov – 1 Dec 2016
Messe Düsseldorf, Germany
www.composites-europe.com
The whole world of composites

Dear exhibitors

With its steady growth, COMPOSITES EUROPE has developed into the biggest industry event in Germany over the past 10 years. And the industry and the specialist trade fair are also set to continue on course for growth in the future.

Make sure you’re a part of it when the whole composites industry gets together in Düsseldorf from 29 November until 1 December 2016. Register as an exhibitor of COMPOSITES EUROPE 2016 now and secure yourself the best stand position.

Profit from the synergy effects of our varied marketing and promotional options. See for yourself!

Together with the COMPOSITES EUROPE team, I’m looking forward to welcoming you in Düsseldorf!

Best regards

Olaf Freier
Event Director COMPOSITES EUROPE
REASONS TO PARTICIPATE

Largest composites market in the industrial heart of Europe ......................................... p.  4

Unique target group ........................................................................................................ p.  5

Complete process chain – range of topics ....................................................... p.  6

Supporting programme ................................................................................................ p.  7

Expected figures – COMPOSITES EUROPE 2016

11,000 visitors .............................................................. p.  3

... from more than 60 nations

470 exhibitors .............................................................. p.  3

... from more than 30 nations

“COMPOSITES EUROPE has developed very well and is becoming more and more important for us. In particular, the automotive industry is represented well on the part of the visitors, among them this year there will also be all renowned manufacturers from Japan such as Toyota, Honda and Nissan. The economic growth perspectives for Evonik in the field of composites are very good; we expect a two-digit growth for our market segment.”

Dr. Stephan Sprenger, Senior Market Development Manager Composites and Lightweight Construction, Evonik Hanse GmbH, COMPOSITES EUROPE 2014
The European composites market is on course for growth.

Germany is Europe’s number 1 in the composites business and the strongest driver of growth.

COMPOSITES EUROPE takes place annually, alternating between Düsseldorf and Stuttgart and is thereby hosted by two important industrial locations.

2016 back in Düsseldorf again. The economic area of Düsseldorf is one of the most research-intensive locations in Germany.

With an export quota of over 46%, Düsseldorf’s industry is strongly involved, to an above-average extent, in the global economy.*

Out of all the big cities in the region of North Rhine-Westphalia, Düsseldorf is one of the most significant industrial locations.

The world of materials in one place – co-located to the world’s leading trade fair ALUMINIUM 2016. Visitors have the opportunity to visit both trade fairs with one ticket.

Profit from the good connection to Messe Düsseldorf – by car, bus & train or plane.

UNIQUE TARGET GROUP –
THE VARIETY OF APPLICATION INDUSTRIES
AT COMPOSITES EUROPE

**Visitors (11,000*)**

- 45% of whom are visitors from abroad from a total of 60 countries*
- Top 5 visitor countries apart from Germany: Netherlands, Italy, Belgium, Austria, Great Britain/Ireland (COMPOSITES EUROPE 2014)

40% of visitors come from research, development and construction**

74% of visitors make procurement decisions or influence them**

70% of visitors have not been to the JEC in France**

**Application industries {multiple answers possible}**

*“For KraussMaffei, COMPOSITES EUROPE is an important trade fair which gives us a clear picture of how the market works. Also this year, the majority of visitors came to our booth with specific project ideas. It was certainly the developments at BMW which opened the doors for the boom in the composites industry. The RTM procedure showed that fibre-reinforced plastics can also be produced in high volumes. However, today the demand is not limited to duroplastic matrix systems. Thermoplastic solutions are clearly up and coming and open up completely new opportunities with regard to cost optimisation, functionalisation or recyclability.”*

Erich Fries, Business Unit Leader Composites/Surfaces, KraussMaffei, COMPOSITES EUROPE 2014

*“For ENGEL it was a premiere at COMPOSITES EUROPE – and it was a good decision to exhibit here. We met all the OEMs that are important for us. For us, the trade fair is the right event to establish ourselves on the composites market.”*

Peter Egger, Area Leader Technology Centre for Light Construction Composites, ENGEL AUSTRIA GmbH, COMPOSITES EUROPE 2014

* Expected figures 2016.
SUPPORTING PROGRAMME –
COMBINED NETWORKING & BUSINESS

Product Demonstration Area (PDA)
The number 1 visitor magnet! Demonstrate your innovative products and
new procedures as a live presentation within everyone’s grasp – bundled on
an impressive special area with the best networking opportunities.

COMPOSITES Forum
The COMPOSITES Forum offers exhibitors space for presentations on current
topics of the industry, innovations and research results or best practices
from the application industries. It is all about: sharing successful solutions
and communicating achievements.

Guided Tours
The Guided Tours concentrate on selected topics and take interested
groups of visitors on targeted tours to the stands of participating
exhibitors.

COMPOSITES Night
Relaxed and joyful networking at a joint evening event of the 2nd International
Composites Congress (ICC) and COMPOSITES EUROPE on the evening before
the trade fair starts!

2nd International Composites Congress
For the second time, the International Composites Congress (ICC) will be the
kick-off to COMPOSITES EUROPE. International experts will discuss current
topics of the composites industry and recess these at the subsequent visit
of the COMPOSITES EUROPE 2016 trade fair.

28 – 29 November 2016, CCD Stadthalle Congress Center Düsseldorf
